RECOMMENDED PLANT LIST

Appropriate and aesthetically pleasing landscaping of individual Lots at BayCrossing is integral to the success of the community as a whole. A list of recommended plant materials that thrive in our region is provided for use by Builders, Lot Owners, and landscape contractors. The list represents a core group of plants, evergreen and deciduous, flowering and non-flowering, of various sizes at maturity, which perform well in our area. The list is not absolutely complete, and naturally other plants not appearing on our list are worthy of consideration. The intention is to provide a group of plants which are well-suited to our geographic location and which exhibit desirable ornamental characteristics. Many of the plants listed are indigenous (native) to our region: and several display desirable characteristics such as drought tolerance (xeriscape plants) and tolerance of heavy (clay) soils. Local plant nurseries should be consulted to obtain specific information on the improved varieties that may be available and the sun/shade exposure requirements of each plant.
